

W.T.  
SeaAir

## Distribution

W.T. SeaAir's dynamic and integrated road haulage services form an integral part of our supply chain capabilities.

Using an established network of approved partners and hauliers combined with our expertise in moving both garments and boxed products, clients benefit from a wide range of transport services which can be tailored to meet any profile.

By understanding your business, we focus on producing scalable overland solutions to meet defined transit times, order book requirements and forecast scheduling.

All of our container deliveries are facilitated using dedicated subcontractors to ensure your on time final mile requirements are met.

# Distribution

## Primary Distribution

We have equipment variety and capacity to handle seasonality conundrums, volatile purchase order requirements and diverse product lines.

Strategic origin "milk runs" can be planned for consolidation as well as optimising vehicle fill at source to reduce the overall financial burden and deliver intelligent supply chains.

From product leaving the factory to arriving in the UK and transportation to the end user, we ensure there is a smooth transition process with in-depth checking procedures.

Our distribution service options include:

### Super Express

Ideal for time definite and business critical requirements where cargo receipt is the key driver.

### Express

A cost-effective option for clients with greater flexibility over time constraints.

### Normal

Appropriate for synchronised factory production and order book requirements.

## Container Transportation

Executing on time deliveries is an essential ingredient when taking ownership of the "final mile" solution. As a result, W.T. SeaAir employs dedicated subcontractors to fulfil this - demanding role to ensure deliveries are "on time-first time"

## E.R.T.S.

Our bonded E.R.T.S. facilities offer client extended liquidity benefits where distribution centres operate on a bonded basis.

## Duty Management Services

W.T. SeaAir provides a full customs bureau management service from simple home use entries to migrating type 'E' bonded warehousing; by optimising duty and VAT payments, cash flow benefits and direct cost savings are realised.

## Visibility

We create bespoke supply chain management applications from complex purchase order management systems to simple track and trace services so that your distribution data can be configured to any reporting requirement.

## Additional Services

- Finished Goods Distribution
- Pick and Pack
- Pre-Retail Services
- Merge in Transit
- Product Postponement
- Returns Programme
