W.T. SeaAir provides a fully integrated IT solution dedicated to delivering flexibility and unrivalled capacity.

From complex purchase order management systems to simple track and trace services, we create bespoke supply chain management applications without constraints or preconditions over functionality or access.

Our web based systems are designed to maintain accuracy and integrity of data which is easily available to everyone from the merchandiser and buyers to the imports controller, expeditor and accountant.

Concurrently, we also incorporate a road map programme that constantly re-evaluates the range architecture available for each user group to facilitate adjustments and upgrades.

W.T. SeaAir provides a fully integrated IT solution dedicated to delivering flexibility and unrivalled capacity.

Products and Services

W.T. SeaAir's unique approach to systems integration is to build client specific applications that work cross-functionally and deliver outstanding results.

We offer a two-tier construction path dependent on requirements:

Pipeline View

Pipeline View offers simple intermodal tracking services for both imports, exports and cross trade routes guaranteeing complete visibility of all movements by sea, air, road, sea-air and courier. Information is easily accessible with pre-configured reporting streams via an immediate log-in.

Home Page

Our Home Page package offers clients a completely bespoke application.

By assessing specific needs, we create a tailored product that acts as a natural extension of your system.

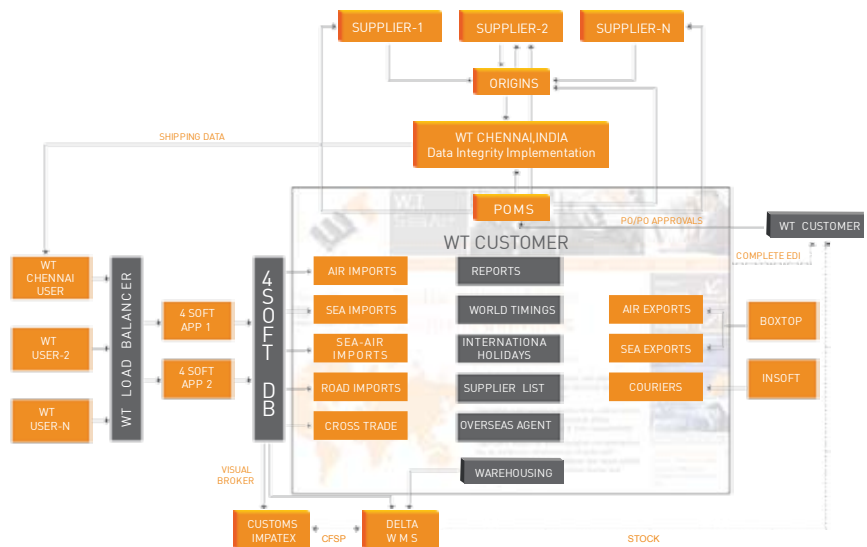

Data Exchange

Two-way data transfer protocols between systems and a purchase order upload facility via EDI, ensures seamless continuity in a fast moving environment.

Additional Services

- Warehouse Management System and Duty Management Services links
- Documents, invoices and statements uploads
- World timings linked to your vendor base
- International holidays
- Supplier list
- Overseas WTSA and GFM.net partner details
- SOP upload & KPI reporting
