

W.T.  
SeaAir

# Shipping

W.T. SeaAir's global seafreight capabilities are dedicated to delivering real solutions through hard working supply chains.

Our robust shipping portfolio provides the optimal balance between non negotiable deadlines and typical slow moving traffic to manage a diverse product mix with the best choice of carrier, transit times and reliability.

We have considerable leverage over space availability and price through our strong client base of high street retailers and their suppliers.

Simultaneously, our logistics expertise and strategic infrastructure means we can offer clients a closed loop approach from planning carrier space at origin, to taking ownership of the 'final mile' delivery.

W.T. SeaAir's global seafreight capabilities are dedicated to delivering real solutions through hard working supply chains.

## Products and Services

### Fast

For time definite cargo, this service offers clients the fastest direct schedules with the most frequent departures and the best carriers available, ensuring stock availability meets all planning deadlines and forecast requirements.

### Slow

For clients wishing to add longevity across their supply chain, this cost-effective service offers flexible transit times through a substantial carrier base portfolio.

Ideally suited to stock build programmes and slow moving lines, it can also be blended with other products to create a flexible and agile supply chain.

### Validity

Where budgetary constraints are the key driver, we offer clients a one year validity package or, where market forces dictate, a quarterly rate. For those businesses that wish to combine the two characteristics, W.T. SeaAir can offer a truly dynamic solution.

### Consolidation

To manage small order requirements from multiple vendors, we offer a blend of origin consolidation centres and co-loader partners which ensure order profiles of any complexity are matched by stock visibility. Our menu of origin services combine to deliver many upstream benefits.

### Cross Trade

Cross trade shipping can be incorporated into our solutions toolkit; data can be fed through our IT platform to create a visible market.

### Inland Haulage

W.T. SeaAir manages every aspect of your supply chain, taking ownership of all areas including the provision of merchant haulage for 'final mile' delivery requirements. From scheduling goods' arrival to co-ordinating with carriers and our own sub-contractors, our end-to-end solutions deliver operational excellence.

### Outbound

We are ideally placed to manage all client export requirements with a full service proposition, including product collection, documentation processing and customs formalities.

### Duty Management Services

W.T. SeaAir provides a full customs bureau management service from simple home use entries to migrating type E bonded warehousing; by optimising duty and VAT payments, cash flow benefits and direct cost savings are realised.

### Visibility

We create bespoke supply chain management applications from complex purchase order management systems to simple track and trace services so that your shipping data can be configured to any reporting requirement.

### Additional Services
